Spray Station 1900®

Ideal homeowner system for first time users

Earlex brings you this multi-purpose lightweight HVLP Paint Sprayer. Ideal for small to medium size projects inside and outside the home. Interior projects such as walls, ceilings, crown molding and radiators can be painted with ease, while exterior projects like fences, decks and shutters can be completed in no time with a professional finish. The project spray gun provides an air jacket that surrounds the material being sprayed which ensures minimal overspray during indoor and outdoor use. Painting doesn't get much easier than this.

Ideal for water-based and oil-based materials such as thinned latex, polyurethanes, lacquers, varnishes, stains and sealants.
